“Cinderella” is a fairy tale that has been told in various forms around the world for centuries. There are some 345 to 1,000 versions of the story, an indication that it conveys archetypal patterns and energy that escape time and place. It has depth that is often overlooked. In this class we will look at the archetypes in the tale as well as “shadow” aspects that loom large. The tale, rich in symbolism, addresses some basic complexes and gives hints at working with them for the Cinderella in each of us, male or female. If you are able, read some of the versions from various cultures that can be found online prior to the class. Do you really know the story?
